1. **True or False.** For Personal Protective Equipment to protect you, it must be worn and used properly.
2. **True or False** When considering the priorities of hazard prevention, PPE is at the top of the list and should be the first thing considered.
3. **True or False.** Safety Glasses provide better protection than normal street wear glasses because of the strength of the lenses and the construction of the frame.
4. **True or False.** It is acceptable to wear a face shield only, because it covers your entire face, including your eyes
5. **True or False.** Hard hat's most importance part is it's suspension, which should be kept at least 1-1/4 inches above your head
6. **True or False.** Hard hats can protect you from falling materials
7. **True or False.** Vinyl gloves are very resistant and can be used with any chemicals
8. **True or False.** When you are uncertain is a glove is acceptable to use with certain chemical, you should check the Material Safety Data Sheet.
9. **True or False.** Foot injuries are most likely to occur when heavy objects are dropped on your foot, when something rolls over your foot, or when you step on an object that pierces the sole of your shoes.
10. **True or False.** Personal Protective Equipment must fit properly to effectively protect you.
11. **True or False.** Proper maintenance, or cleaning, storage will prolong the life of your personal protective equipment and ensure its effectiveness.
12. **True or False.** If you have any questions about personal protective equipment, you can contact your resource or safety manager.
